

## LAPTOP STORAGE TROLLEY - 12 BAY

**NEW  
RELEASE**

Ideal for education organisations. The Gilkon 12 Bay Laptop Storage Trolley facilitates the storage and safe movement of multiple computers in a secure unit.

Safety and convenience are key factors in the design of this trolley. A unique timer system is built into the charging bay. This eliminates the risk of heat build up from excessive power usage. Charging system also has overload switch.

For added security, Gilkon offers the option of a unique "Docking Station" that enables the trolley to be locked in a central location. The trolley simply slides into the wall mounted heavy steel station and secured with a steel pin and padlock.

- Stores 12 laptop computers.
- Storage design ensures no damage to computers.
- Built-in power boards to charge computers while in storage.
- All metal construction.
- Contemporary finish and colour scheme.
- Designed and manufactured in Australia by Gilkon.
- Code: Trolley **2LCMT-12** Dock Station **2LCMT-12DS**
