

Polycom VSX 5000

Video conferencing system offering excellent price performance and flexibility

Polycom VSX 5000 Benefits

Superior, natural sound – Polycom StereoSurround™ delivers crisp, natural voice clarity - even when multiples parties are speaking simultaneously – by using dual channel, Siren™ 14 technology

Outstanding video – Premium quality video at any bandwidth with smooth natural motion and sharp, clear images. Employs standard-based H.264 compression and Pro-Motion™ video for optimal viewing

Multimedia made easy – Show high-res images, movies or presentations in your meetings while also sharing video. And, you can share PC content cable-free using Polycom's unique People+Content™ IP technology

Reliability – Integrated electronic Pan-Tilt-Zoom (PTZ) camera has fewer moving parts and therefore offers more reliability, while offering functionality similar to mechanical PTZ cameras

Network friendly – Features include video and audio error concealment, UPnP, NAT and Closed Captioning support, embedded encryption, plus Web streaming

Complete solution packages – Combine the VSX 5000 with any of Polycom's attractive furniture display options to create a total meeting room solution

The Polycom Solution – Everything you need to deploy and manage a complete video conferencing network with Polycom Global Management System™, Polycom PathNavigator™, Polycom Conference Suite™ and the Polycom MGC™

Introducing the Polycom VSX 5000, a compact and economical solution for small to medium-sized conference rooms.

Ideal for smaller conference spaces, the new entry-level Polycom VSX 5000 set-top system brings market-leading video and audio quality within an affordable price. A real space-saver, it sits conveniently on top of TVs, high-resolution plasma screens, or LCD displays. You can easily add a peripheral (document camera, or VCR/DVD), dual monitors, and audio-only callers through ISDN or the SoundStation VTX 1000®. In fact, the VSX 5000 gives you multiple ways of dialing conference attendees and employing various types of content (for example, pictures, presentations, movies, audio files). Connection options encompass IP, ISDN, and SIP dialing, so you can utilize the VSX 5000 in a variety of conference environments.

The VSX 5000 is also well-suited for educational resource rooms where smaller groups of students meet with a remote educational specialist, and remote medical clinics that deliver specialist care to patients hundreds of kilometers from home.

The VSX 5000 includes features and benefits such as a user interface in 13 languages, multiple ways to add content, and dual monitor emulation for single display solutions. Choose either a VGA display or a TV as your main display, whichever suits your conferencing environment. The ISDN option enables you to add ISDN conferencing capability as well, and the dual monitor option allows you to show people on one display and shared content on the other display.

When you're ready to upgrade your meeting room environment even further, you can take advantage of Polycom's SoundStation VTX 1000 integration, giving users the ability to dial a video conference from their conference phone. This also saves space on the conference table, since the SoundStation VTX 1000 also acts as the stereo microphone as well as a standalone conference phone. Plus, dedicated stereo audio outputs enable easy implementation of Polycom's StereoSurround™ technology, for sound that is as natural as being there.

Your single platform choice for conference management and scheduling to access the power of Polycom's unified collaborative communications solutions.

With the greatest breadth and depth of integrated video, voice, and Web solutions, only Polycom delivers the ultimate communications experience. Our market-leading conferencing and collaboration technologies, supported by world-class service, enable people and organizations to maximize their effectiveness and productivity. Add to that the most experience and proven best-practices in the industry, and it's clear why Polycom has become the smart choice for organizations seeking a strategic advantage in a real-time world.
